“ Bubba and Nana were the only reason that I got involved in tennis, as one of my first memories is he and Nana bringing me to the tennis courts to hit and practice on the ball machine. We would always watch tennis when we spent time together and talk about our favorite players and strategies in the sport. When I played tennis for my High School team, he would come to some matches and cheer me on. Just that influence at a foundational age has made a sizable difference in my life and has brought me much joy.
